Continuation of Substance of Interview including description of the general nature of what was discussed:

The examiner had noted that the office's records were inconsistent, with Palm saying that the restriction requirement had been mailed on 7/20/2007, while the scanned file showed no such documents or other documents since filing, hence the Examiner made a call to James Hamilton, left a message to this effect & asked if any written restriction requirement had been received. Applicant's files were checked & no restriction requirement was found therein, and it was noted that if properly mailed the document should have been received electronically. Public Pair was also checked & no copy of the restriction requirement found therein.

(Since discussions with applicant's representatives, it is noted that scanning personnel have since found the papers & scanned them into the application file, but this does not correct the question of appropriate mailing.)

Due to apparent errors, the restriction is being remailed & time restarted.
